

Experience in Action

An art-science collaboration exploring movement and sensory experiences in older autistic adults & people with Parkinson's.

Older adults with Parkinson's or autism (>40 years of age) are invited to an artistic experience to help shape future research. At our interactive art-science session you can meet scientists and artists who will help you to explore and share your experience of movement and the body.

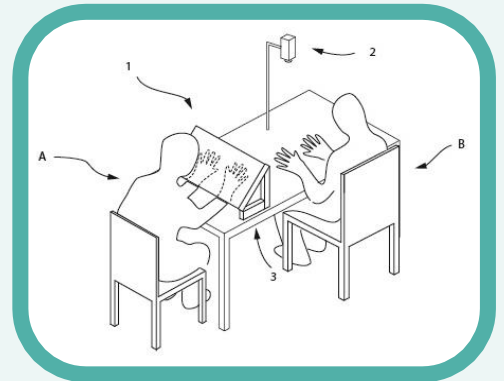

Dates: 4th, 7th & 9th May 2022

Venue: **Manchester Art Gallery**,
Mosley St, Manchester M2 3JL

A BEAM lab event in collaboration with Antony Hall

The **Body Eyes and Movement (BEAM)** laboratory, led by Ellen Poliakoff and Emma Gowen, conducts research into how movement is affected in both autism and Parkinson's.

<https://blogs.manchester.ac.uk/beamlab/>

Antony Hall is an artist, educator and researcher who works in the fields of art and science. His projects often stem from scientific experiments which he re-invents outside of their scientific contexts. <http://antonyhall.net/blog>
